

calmat® Do-It-Yourself installation

**calmat® is installed within a few minutes:
No tools required – No need to cut the piping system**

- | | |
|----------|---|
| 1 | Attach calmat® to the pipe |
| 2 | Wind the impulse cables around the pipe |
| 3 | Connect the plug to the power supply |

Once installed, calmat® operates absolutely maintenance-free

calmat® The scale problem

Hard water and its effects on your house

Scale deposits on the inside of pipes, on heating elements or on household appliances create many typical problems such as:

- ✗ Decreased water pressure
- ✗ Loss of energy in the hot water circuit
- ✗ Dull surfaces in kitchen and bathrooms
- ✗ Repeated repairs or replacement of household appliances or - in the worst case - replacement of your whole piping system

Get your solution against scale and rust today!

calmat® Against scale and rust

The **eco-friendly** solution for better water in your home

calmat® The eco-friendly solution

- ▶ **Protects your whole piping system, appliances and equipment against limescale and rust**
- ▶ **Suitable for all pipe materials: iron, copper, plastic, PVC, compound pipes etc.**
- ▶ **calmat® - max. 1 1/2" pipe**
- ▶ **calmat® PLUS - max. 3" pipe**

Eco-friendly - no salt or chemicals needed	
Maintenance-free	
Developed and manufactured in Germany	
3 year international warranty	
Low electricity costs (approx. 3 €/year)	
High-quality product	

calmat® The 3 calmat® effects

1 calmat® stops scaling on surfaces

calmat® modifies the crystallization of the calcium so that it cannot connect to surfaces anymore and is washed away with the water as a fine powder.

2 calmat® gently reduces existing build-up

calmat® carefully resolves already existing build-up in the piping system. Only a thin protective layer remains on the inside of the pipe.

3 calmat® protects against rust and corrosion

calmat® generates a controlled electrophoresis process which produces a protective metal-carbonate layer. This layer protects against rust and corrosion.

calmat® Your benefits

- ✓ Gentle reduction of scale deposits in the whole piping system
- ✓ Less time and money spent on repairs and maintenance in your home
- ✓ Important minerals such as calcium and magnesium remain in the water
- ✓ Considerable savings in washing and cleaning agents
- ✓ Faster cleaning of kitchen and bathrooms
- ✓ Water pressure will be restored
- ✓ High efficiency for your heating and hot water system
